- Nginx, Apache, Traefik
- Shell scripting

Awards

- Winner of 6th ICT Challenge, Hosted by Sharif University, 2021

- Third place of 4th ICT Challenge, Hosted by Golestan University, 2019

Experience

I've been working with individuals and companies as a freelancer since 2017.

I'm experienced in the implementation of platforms for selling products whether physical or digital on landing pages and Telegram bots. *(e.g., Bebb.in, Addino, Digiproxy, etc.)*

Also, I've done a number of backend implementation (ReST API) and data crawling projects. *(e.g., Bazify.io, scraping Instagram, official inquiry sites, Turkish shops)*

Further, I've worked on some smart contracts, dapp's and financial related bots.

I've taught in person and made tutorials on youtube as well.

Languages

Persian (native)

English (working proficiency)

Education

Bachelor of Software Engineering
Payam-e-nour University (2018-2022)
